behance.net/f588a8ae | Arabic (Native) — English (B2)

CAREER OBJECTIVE

Site Engineer / Architect with over 10 years of combined field-execution and design experience in infrastructure, utilities, and residential construction. Specialized in potable water networks, sewage/wastewater systems, storage tanks, and multi-building residential developments, with a strong record of quality assurance, contractor coordination, and on-schedule delivery. Also brings hands-on architectural design experience, including the full design (plans and façades) of a 9-villa classical residential development. Seeking to bring this combined field-execution and design expertise to large-scale infrastructure and utilities megaprojects in Saudi Arabia and the wider Gulf region, where reliable site supervision, disciplined technical documentation, and fast-track delivery are critical to project success.

KEY STRENGTHS FOR LARGE-SCALE INFRASTRUCTURE MEGAPROJECTS

- **Classical villa design portfolio:** delivered full architectural design (plans and façades) for a 9-villa classical residential development — direct evidence of design quality for premium residential and hospitality packages.
- **Direct utilities expertise:** 10+ years supervising water supply networks, sewage/wastewater systems, and storage tanks — core scope of port, industrial, and residential infrastructure packages on large-scale developments.
- **Megaproject-ready documentation skills:** proven ability to prepare BoQs, technical reports, and phase-by-phase photographic records — matching the strict reporting standards required on large-scale, multi-stakeholder developments.
- **Residential & community-facility execution:** delivered a 12-building, 5-floor youth housing complex and a multi-function social center, directly transferable to residential and community infrastructure scopes on large developments.
- **Design + field combination:** Architecture degree paired with site execution experience enables smooth coordination between design intent and on-site delivery — valuable for design-and-build packages.
- **Mobilization-ready:** able to relocate promptly, work in demanding multicultural megaproject environments, and adapt quickly to changing operational conditions.

CORE QUALIFICATIONS

- **Bachelor's degree in Architecture** — Damascus University (2014)
- **10+ years as a Site Engineer (2016 – Present)**, combined with hands-on architectural design experience
- Specialized field experience in water supply networks, sewage/wastewater systems, storage tanks, and facility rehabilitation
- Direct site supervision of execution and finishing works for residential villas and apartment buildings
- **Architectural design experience:** full plans and façades for a 9-villa classical residential development
- **Proficient in AutoCAD and Revit** for shop drawings, field coordination, and BIM-based collaboration
- **Full command of Microsoft Office** (Word, Excel, PowerPoint) for reports, BoQs, and project schedules
- **Skilled in preparing technical documentation**, periodic progress reports, and phase-by-phase site photography — aligned with international contractor reporting standards
- **Strict commitment to quality control, HSE/safety standards**, and schedule adherence on multi-stakeholder projects
- Strong capacity to work under pressure in fast-track, multicultural megaproject environments

PROFESSIONAL EXPERIENCE

Site Engineer — Infrastructure, Utilities & Quality Assurance

As-Suwayda Governorate, Syrian Arab Republic | 2016 – 2026

- **Sewage Network Project — Mardak & Majdal Villages:** Supervised excavation, pipe-laying, network testing, and compliance with technical specifications for a multi-village wastewater infrastructure package.
- **Youth Housing Complex (12 buildings, 5 floors):** Managed execution of upper/lower water tanks, internal water-supply systems, and common-area infrastructure — directly comparable in scale to large-development residential packages.
- **Charitable Social Center (clinics, education hall, admin rooms):** Delivered the project on schedule, enforced material-quality control, and documented every construction phase.
- **Residential Villas & Apartments — Execution & Finishing Supervision:** Directly supervised the execution and finishing works of residential villas and apartment buildings across As-Suwayda Governorate, overseeing construction quality through to final finishing stages.
- **9-Villa Classical Residential Development:** Led the full architectural design — including plans and façades — for nine classical-style villas, demonstrating design capability for premium residential and hospitality developments.
- **Tourism & Heritage Development — Najran Village, As-Suwayda Governorate:** Contributed to the design and execution of projects supporting local economic development and heritage preservation.

Key Responsibilities & Achievements

- Daily site supervision ensuring strict adherence to designs, specifications, and international quality standards
- Inspected incoming materials against invoices and specifications; rejected non-compliant deliveries to protect project quality
- Prepared weekly progress reports, photographic documentation, and material receipt logs for stakeholders and management
- Coordinated daily with contractors, logistics teams, and central project management to maintain schedule and resolve site issues
- Supported preparation of Bills of Quantities (BoQs) and cost-control documentation for utilities and building works

VOLUNTEER & COMMUNITY WORK

Volunteer Teacher — Syrian Arab Red Crescent

2017 – 2023

- Delivered free Mathematics and Physics lessons to middle-school, high-school, and university students
- Active at Red Crescent centers in Najran village and As-Suwayda City, and the primary school in Najran — reflecting strong community engagement and communication skills valuable to multinational project teams

TECHNICAL SKILLS

AutoCAD	Advanced
Revit	Advanced
3D Studio Max — with V-Ray & Corona Renderer	Advanced
Blender — 3D Modeling & Architectural Rendering	Advanced
ArchiCAD	Good
Microsoft Office (Word, Excel, PowerPoint)	Advanced
Technical Reporting & Site Documentation	Excellent

Construction Site & Contractor Management	Excellent
Water Supply & Sewage Network Supervision	Excellent
English (Technical Writing / Reading)	Good — B2
AI Platforms — Image Generation, Video Production & BIM Model Generation	Advanced

ATTACHMENTS (AVAILABLE UPON REQUEST)

- Bachelor's Degree Certificate
- Two reference letters from previous project managers
- Samples of technical reports and shop drawings
- Professional Portfolio Website: anasnaser88.github.io
- Behance portfolio: www.behance.net/f588a8ae
