Behance: www.behance.net/f588a8ae

Languages: Arabic (Native), English (B2 – Good Writing and Speaking)

Professional Summary

Site Engineer with over **10 years of experience** in field supervision, quality assurance, and managing the execution of infrastructure projects, residential buildings, and community facilities in As-Suwayda Governorate. I have worked on projects including water systems, sewage networks, storage tanks, and facility rehabilitation.

I began my professional career in Najran village, where I contributed to the development of tourism and heritage projects aimed at supporting the local economy. I later settled in As-Suwayda City, where I continued my engineering work and community involvement.

Core Qualifications

- **Bachelor's degree in Architecture** – Damascus University (2014)
- Over **3 years of experience** as a Site Engineer (2016–Present)
- Practical experience in water projects, sewage, and building rehabilitation

- Proficiency in **AutoCAD** and **Revit** for preparing shop drawings and field follow-up
 - Full proficiency in **Microsoft Office** (Word, Excel, PowerPoint) for preparing reports, Bills of Quantities (BoQs), and schedules
 - Proven ability to prepare technical documentation, periodic reports, and illustrative photos for each project phase
 - Strict commitment to quality, safety standards, and on-time delivery
 - High ability to work under pressure and in changing operational environments
-

Professional Experience

Site Engineer – Field Supervision and Quality Assurance

As-Suwayda Governorate / 2016 – 2026

- **Sewage project in Mardak and Majdal villages:** Supervising excavation, pipe laying, network testing, and ensuring compliance with technical specifications.
- **Youth Housing Complex (12 buildings, 5 floors):** Managing the execution of upper and lower tanks, internal water systems, and common corridors.
- **Charitable Social Center (Medical clinics, education hall, administrative rooms):** Executing the project within the schedule, ensuring material quality, and documenting each phase.
- **Tourism development projects in Najran village and As-Suwayda city:** Contributing to the design and execution of projects aimed at stimulating the local economy and protecting structural identity.

Key Accomplished Tasks:

- Daily supervision of work sites and ensuring adherence to designs and specifications.
- Reviewing received materials against invoices and specifications, and rejecting non-compliant ones.
- Preparing weekly progress reports, documentation photos, and receipt logs.
- Coordinating with contractors, logistics teams, and central management.
- Supporting the preparation of Bills of Quantities (BoQs) and financial documents related to the works.

Volunteer and Community Work

Volunteer Teacher – Syrian Arab Red Crescent

2017 – 2023

- Providing free lessons in Mathematics and Physics for middle school, high school, and university students.
 - Participation in centers: Red Crescent in Najran, Al-Naser Social Center – As-Suwayda City, and the primary school in Najran.
-
